

VIEW STRUCTURE OF A DESIGN VIA STITCH SELECTION

Did you know this T8 function yet?

What?

Use the Stitch Selection function to view the design structure by stitch, section (step), or needle change.

How?

On the start screen press the R3 function key to enter the „Approach new stitch number“ window.

Use the R3-R6 function keys to navigate to the specific section of your design. Pressing „Next/Previous step“ will direct you to the next stop, thread cut or colour change.

After viewing the design structure, press ESC to avoid moving to a specific stitch.
